

C5100 Battery Testing System

The C5100 Battery Testing System for use in retail stores will immediately boost your business by improving customer care, increasing revenue, and reducing costs associated with battery replacements.

Cadex C5100 including the RigidArm™ Adapter

- **Test modern mobile phone batteries in 30 seconds**
Supports batteries with rated capacities from 700-1,800 mAh
- **Proprietary QuickSort™ technology**
Sort batteries as Good/Low/Poor based on their State of Health (SoH)
- **Boost function**
Revives batteries that have gone to sleep

QuickSort™ classifies the health of batteries in under 30 seconds

- Good** - 80% and higher; can be reused
- Low** - 70 to 80%; should be replaced
- Poor** - 70% and less; discard

Benefits of Battery Testing:

- ✓ **Improve Customer Care**
Increase your customer satisfaction and loyalty by addressing one of the most common customer complaints.
- ✓ **Generate Additional Revenue**
Promote customer engagement by using the service to sell accessories and applications.
- ✓ **Reduce Costs To Save Money**
Lower the number of good batteries you replace at your cost.

Studies show that 90% of returned batteries have no fault - manufacturers, service providers and retailers pay for these errors.

C5100 Battery Testing System

Included RigidArm™ Battery Adapter

The RigidArm™ is designed for easy connection of mobile phone batteries. Spring-loaded arms lock in position to allow quick and accurate setup for repetitive testing. A retractable floor holds batteries vertically or horizontally; adjustable magnetic battery guides are included. Banana plugs offer easy polarity selection; temperature sensor ensures safe operation.

- Universal battery adapter suitable for most battery types
- Allows multiple mounting orientations
- New design with increased robustness

The RigidArm™ allows an easy interface to the battery

Optional PC-BatteryStore™

PC-BatteryStore™ software provides an extension to storefront battery testing. With a PC, you can store customer information, record anomalies and print service report carrying the name of your business.

You can record and export test results to a database and evaluate unique battery issues across multiple locations.
