C7 Adapter - Li Battery Warning Label Explanation

August 20, 2021

The Cadex C7 model analyzers range from the first released models (C7000, BOS, C7000ER), to its current models (C7200-C, C7400-C, C7400ER-C). The Snap Lock style adapters can be used on any of these models, but depending on the chemistry type, there may be some limitations.

The older C7000, BOS, and C7000ER units may trip some Li-ion or Li-polymer batteries over voltage protection. Adapters that are not compatible will have the following warning label.

The C7000, BOS, and C7000ER units can be easily identified by their square buttons. All newer models have circular or oval buttons.
